Ballarat Radio Club. —The chief feature in connection with last night's meeting- of the Ballarat Radio Club at the Y.M.C.A. building was the visit of Mr Martin, chief Government in. inspector. His principal object in coming to Ballarat was to remove misunderstandings with regard to the new regulations which he went through in detail, and explained at length. One regulation on which he laid some stress was that with regard to regeneration. This he said was being broken in Ballarat as well as other cities. Mr Martin stated that the club would be required to appoint an honorary inspector, who would be vested with full powers by the Commonwealth. It would be his duty to see that all those possessed of wireless sets were complying with the regulations; to warn any who had transgressed, and to report them, to the authorities if they persisted in breaking the regulations. Three nominations have been made by the club for the office of inspector, and the Government department; will make an appointment from these. The Ballarat Club is making most commendable progress. The set has been increased by the addition oi another valve, and now is as powerful as that owned by any club in Australia. A loud speaker will be put in before the next meeting. The plant will ultimately be capable of receiving messages from the Bordeaux station in France. It may he mentioned that already Messrs R. Bennett and W. A. Wilson, prominent members of the club, have received on their own private sets messages in code from Bordeaux.
